## INSURANCE TRIAL ON

Sharp Clashes Numerous at New York Life Hearing.

DENY ILLEGAL USE OF MONEY

Affidavits Presented Showing None of Policy Holders' Cash Is Used by Administration in Election of the Trustees-Judge Parker and Representative Longworth Mentioned.

New York, Nov. 9.-Lawyers William Nelson Cromwell and Samuel Untermeyer had it hot and heavy to-day in the Supreme Court before Justice Dowling. The occasion was the hearing of a suit that Stephen Farrelly brought to restrain the New York Life Insurance Company, as a corporation, and twenty directors of the company, as individuals, from spending policy holders' money in campaigning for the administration ticket of trustees.

Mr. Cromwell, representing the company and the trustees, made a sweeping denial of all of Mr. Farrelly's charges, and filed over ninety affidavits to support his claims. Mr. Untermeyer acted as counsel for Mr. Farrelly, who is a candidate for trustee on the International Policy Holders' Association ticket. Mr. Untermeyer is the general counsel for this association, and the suit was really brought in the interests of that organization Cromwell Charges Intimidation.

Sharp words were indulged in by the two lawyers and several times Justice Dowling had to remonstrate with both. Mr. Cromwell several times charged that the action was brought to intimidate policy holders in their vote. Mr. Untermeyer for Mr. Farrelly charged that the circulars, envelopes and printed inclosures together with the stamps to be used in returning which were sent to policy holders, in order that they might vote the sample administration ballot and return the same to the offices of the company, were all printed at the expense of the policy holders. This was denied by Mr. Cromwell.

"They were and we know it," exclaimed Untermeyer, "and if they were not, why don't some of your people swear

the company had attempted to coerce agents into working in the interests of the administration ticket. Two affidavits from T. Reid Fell and Edward O. Sutton, discharged agents, were submitted to Mr. Jerome.

The district attorney subsequently had a conference with James McKeen, the general counsel of the Mutual. Later Mr. Jerome announced that he would not mix up in the case until after the election had closed in December, saying that he did not want to be made a party to or have his office used in a factional fight.

Clever Designs for Formal Wear.

Where but one frock must do for formal wear and meet all social occasions for which the plain and severe tailormade is not altogether suitable, the choice of a style color, and design is far more difficult than where the wardrobe can be relied upon for a repertoire of frocks for such uses. It must necessarily be somewhat plain, but not too much so; somewhat dressy, and yet not overelaborate. In short, it must present that happy medium between a plain gown and an extremely formal one. A very clever design of this intent is presented in the illustration, in which English velveteen, crepe de chine, chiffon, and lace are all clev-Washington needed was not great factoerly blended, with handsome embroideries in lace braids and a touch of spangles for relief. ## PLAN A PUBLIC PIER

Recreation Place Is Contemplated by Commissioners.

COMMITTEE WORKS ON IDEA

Docks and Retaining Walls from the Arsenal to the Long Bridge Are to Be Rebuilt, Thereby Providing Increased Wharf Facilities-The Cost Is Now Being Estimated.

A public recreation pier, such as has been adopted by many of the large cities of the countries, will add to the comfort and pleasure of Washingtonians during the summer months, if the plans of the wharfage committee appointed by the Commissioners materialize.

It having been decided by Congress that

the wharf property belongs to the United States, a committee was appoint ed to take charge of the District. Plans are under consideration for im proving the river between the Long Bridge and the arsenal, involving the rebuilding of many of the existing wharves and nearly all of the retaining wall along the city side.

Plans for both timber and concrete docks are under consideration, in order to determine the relative cost. The concrete dock will cost more than the timber, but have the advantage of being fireproof. It is thought when the system is completed, the docks will be able to handle nearly three times as much freight as at present without congestion The committee has at present under consideration plans for the improvement of the Washington channel to the Long

## WEBER PIANOS

## How Do You Judge the Value of a Piano?

CVERYTHING is comparative. The Piano that ranked as the "best" production of its manufacturer twenty years ago is (or ought to be) totally outclassed by the products of the same manufacturer to-day.

A Piano that stands still is really going backwards. What is needed is a basis of comparison for

There is no Piano making such rapid strides forward as the Weber. It is the one Piano that the musical trade is most concerned about—the progress of which is most jealously watched by other manufacturers.

The piano used by Rosenthal, "the wizard of the piano," on his present tour is the Weber. The piano used at the Metropolitan Opera House is the Weber. The piano used by Caruso and other great foreign singers is the Weber.

Yet, rapidly as the prestige of the Weber Piano is growing, it has never held other than one position—in the front rank of the great pianos of the world. But even with great triumphs in its past, it is on the basis of what the Weber Piano is to-day that its tide of popularity is sweeping irresistibly forward.
